# **STEM Education Research** and **Outreach Intern**

Project Title	STEM Education Research and Outreach Intern
Summary	Any students out there looking to share their love for STEM? We are looking for a student who would lend a hand identifying, organizing, and sharing STEM education resources.
Country	United States

### **Project Description**

The Directorate for Education and Human Resources at the National Science Foundation supports agency-wide and cross-agency STEM education initiatives. We are looking for someone to help collect and organize resources at our agency, across other federal agencies, and public resources to identify promising practices. These resources would be shared broadly. Graphics might be needed to share these resources with targeted audiences. You'd work with federal employees and public leaders in STEM education.
